**Subject:** Opinion on Japanese Army's Sexual Slavery

I went to St. Francis Korean Catholic Church on Sunday, yesterday. They told us submit opinion on the above subject. It is our understanding that our opinions can reflect to high school's history book.

As a Korean American, I know the truth of old ages, before 1945, the end of WW II. I was a junior high school and lived in Japanese student's dormitory house under the Japanese rule. I was not discriminated from Japanese students and teachers. The Japanese equally treated civilized and educated Korean, but they discriminated lazy people who, doesn't want to work and learn in free grammar school.

Back then, Korea was very uncivilized, corrupted and barbarous. Most people in farm area have nothing to eat and females, specially young girls, were not considered as human beings and those parents freely gave their daughters away to anybody who wanted without considering those young girls' fates. I have 2 elder sisters who were educated and were grammar school teachers. They were equally treated as Japanese and never discriminated. Uneducated Japanese girls were also treated as the same.

I oppose the idea that the Japanese Army's sexual slavery against Japanese, Korean and other countries' uneducated girls should not be included in the high school history book.
